Sir:

COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE

The Reasons for Allowance characterize the claimed methods as methods for making a corrugation-free foam. None of the independent method claims expressly require that the method is a method of making a corrugation-free foam. In fact, the independent claims call for a method of making "a polymeric foam." Dependent claims 14, 21, 22, 27, 29, 40 are the only claims that expressly characterize the nature of the corrugation for the resultant foam. While there is no doubt that the ultimate goal of the invention is to produce a corrugation-free foam, the claims in the application are not so limited. Therefore, to the extent the Examiner's comment to a corrugation-free foam is directed to the scope of the claims and not the ultimate goal of the invention, Applicants assert that the Examiner's comment is an inaccurate characterization of the

scope of the claims, and Applicants disagree with the characterization. If there are any questions, please contact the undersigned attorney.

Respectfully submitted,

Wayne J. Myer and Blaine M. Kelley
